

# Math TIPS Program

## (K-5)

Mrs. Giannettino

Math TIPS instruction is a service provided to students who need extra assistance with math based skills. Each week students receive explicit instruction in different areas of math in small groups in my classroom. I am very lucky to visit Kindergarten weekly to facilitate lessons with small groups.

The focus of Math TIPS is to enable students with strategies to help complete math curriculum on their grade level. The students use manipulatives, technology, math applications, and small group discussions to help reinforce skills. Through math games and lessons students strengthen their fact fluency.

Math TIPS is a positive, fun environment where students become mathematicians!
